EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Samuel G. Campbell, III, Reg. No. 42,381 on 06/17/2010.

The application has been amended as follows:

In the claims:

Please amend the claims 33 and 52 as follows:

Claim 33, line 3: "a ~~tangible~~ non-transitory computer-readable storage medium coupled to said computer, and"

Claim 52, line 2: "a ~~tangible~~ non-transitory computer-readable storage medium, wherein".

Allowable Subject Matter

1. Claims 1-37, 39-56, 58-70, 90-93 and 96-118 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The primary reasons for the allowance of the independent claims 1, 33, 52, 90, 104 and 112 are the inclusion of the following limitations that are not found in the prior art and they are uniquely distinct features. The closest prior art is Antur et al. (US

6,212,558 A1). Antur et al. discloses a method for configuring a plurality of network security devices, includes the steps of providing a network directory services server providing network directory services to a plurality of network servers, each of the plurality of network servers coupled to one of the plurality of network security devices, and implementing a security policy for the plurality of network security devices on the network directory services server. Antur et al. further discloses firewalls and other types of security devices that provide means of enforcing security policies that define acceptable uses of applications and acceptable access to information for both inbound and outbound.

However, this art fails to anticipate or render the following limitations:

"Claim 1: said second security level information is received from another network node of said network as a result of said second security level information being registered in a context,

said second security level information is configured to be updated by virtue of said second security level information being configured to be combined with third security level information".

"Claim 33: said second security level information is received from another network node of said network as a result of said second security level information being registered in a context,

said second security level information is configured to be updated by virtue of said second security level information being configured to be combined with third security level information".

"Claim 52: said second security level information is received from another network node of said network as a result of said second security level information being registered in a context,

said second security level information is configured to be updated by virtue of said second security level information being configured to be combined with third security level information".

"Claim 90: said second security level information is received from another network node of said network as a result of said second security level information being registered in a context,

said second security level information is configured to be updated by virtue of said second security level information being configured to be combined with third security level information".

"Claim 104: said second security level information is received from another network node of said network as a result of said second security level information being registered in a context,

said second security level information is configured to be updated by virtue of said second security level information being configured to be combined with third security level information".

"Claim 112: said second security level information is received from another network node of said network as a result of said second security level information being registered in a context,

said second security level information is configured to be updated by virtue of said second security level information being configured to be combined with third security level information".

3. The dependent claims 2-32, 34-37, 39-51, 53-56, 58-70, 91-93, 96-103, 105-111 and 113-118 are allowed because they include the same unique features of claims 1, 13 and 19 not found in the closest abovementioned arts.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
